

Germany water coupling

Germany water coupling have two claws that lock together, when the coupling is pushed and turned. The internal lug distance is 40 mm for all the size, which make it easy to connect the hose in different connections, without any other reducer coupling.

Złączki german water couplings produkowane są z mosiądzu oraz stali szlachetnej, pasują do węży przemysłowych, ciśnieniowych, węży do wody, węży do zaprawy, węży ssących. Szeroki zakres zastosowań: budownictwo lądowe, budownictwo drogowe i podziemne, przemysł, techniki środowiskowe, rzemiosło, kanalizacje, budowa ogrodu, odbudowa krajobrazu, gospodarka i leśnictwo. Oferujemy złącza german water couplings w wersji sztywnej oraz w wersji z możliwością obrotu o 360 stopni.

Application / Przeznaczenie

Germany water couplings are widely used in agricultural, gardening and emergency for transferring low pressure water and other liquids.

Material / Materiał

- 1.Stainless steel AISI 316
- 2.Brass
- 3.Stainless steel AISI304 on special demand

Seal / Uszczelka

- 1.As standard the coupling in SS have a green Viton sealing ring
- 2.The brass coupling is with a black NBR sealing ring.
